

FLAME RETARDANT OVERBOOT WELDING+

Application

- Protects shoes during welding operations
- Moulded anti-slip sole
- Extremely durable

Special characteristics

- Very hard-wearing
- No impregnation necessary
- The fabric of the upper material is permanently flame retardant due to its composition, even after numerous washings.
- Very fast drying

CE

- Cat. II
- DIN EN 11612

User instructions

- Launderable up to 40 °C
- Suitable for drying up to 40 °C

Product description

- Stitched-on high quality sole made from natural rubber, black
- Upper material from inherent flame retardant fabric consisting of approx. 30 % Aramide, 40 % wool, 28 % CV FR, 2 % P140, 1.25 % Kevlar, area weight approx. 330 g/m²
- Colour: blue
- Long zipper at the back, covered by flap with press studs inside
- Leg end with elastic
- Knee high

Disposal

The flame retardant overboot WELDING+ is free of chlorine and can be disposed of through incineration. The disposal is based on the types and quantities of contaminants absorbed during use.
